

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A device comprising:  
a receptacle containing a single dose of a treatment substance; and  
an indicator configured to change state as a function of temperature, wherein  
the substance is selected from the following list: a shampoo, a shower gel, a self-tanning substance, a massage oil.
2. (Currently Amended) A device according to claim 1, wherein the indicator is configured to change state a first time when the temperature reaches a first value, and a second time when the temperature reaches a second value that is higher than the first value.
3. (Original) A device according to claim 1, wherein the indicator has an appearance which changes with temperature.
4. (Original) A device according to claim 3, wherein the indicator changes color with temperature.
5. (Original) A device according to claim 3, wherein the indicator has an appearance which changes reversibly with temperature.
6. (Original) A device according to claim 3, wherein the indicator comprises a thermochromic pigment.
7. (Original) A device according to claim 1, wherein the indicator is configured to release a volatile odorous substance when the temperature exceeds a predetermined value.
8. (Original) A device according to claim 1, wherein the indicator comprises at least one flexible support fixed onto the receptacle.
9. (Original) A device according to claim 1, wherein the receptacle comprises a pouch.

10. (Original) A device according to claim 1, wherein the indicator changes state when the temperature reaches a value lying in the range 30°C to 40°C.

11. (Original) A device according to claim 1, wherein the receptacle comprises a fixing member allowing the receptacle to be fixed onto a radiator.

12. (Original) A device according to claim 1, wherein the receptacle comprises ballast allowing the receptacle to have zero or negative buoyancy in water.

13. (Original) A device according to claim 1, wherein the substance is at least one of a cosmetic substance and a care substance.

14. (Canceled)

15. (Withdrawn) A device according to claim 8, wherein the flexible support is fixed onto the receptacle via an adhesive.

16. (Withdrawn) A packaging device comprising:

a receptacle comprising:

a storage space containing a treatment substance and having a first volume,

a dispenser member having a second volume smaller than the first, said dispenser member being capable to be in communication with the storage space; and

an indicator configured to change state as a function of temperature.

17. (Withdrawn) A device according to claim 16, wherein said dispenser member is configured so as to contain a single dose of substance.

18. (Withdrawn) A device according to claim 16, wherein the indicator is configured to change state a first time when the temperature reaches a first value, and a second time when the temperature reaches a second value that is higher than the first.

19. (Withdrawn) A device according to claim 16, wherein the indicator has an appearance which changes with temperature.

20. (Withdrawn) A device according to claim 19, wherein the indicator changes color with temperature.
21. (Withdrawn) A device according to claim 19, wherein the indicator has an appearance which changes reversibly with temperature.
22. (Withdrawn) A device according to claim 19, wherein the indicator comprises a thermochromic pigment.
23. (Withdrawn) A device according to claim 16, wherein the indicator is configured to release a volatile odorous substance when the temperature exceeds a predetermined value.
24. (Withdrawn) A device according to claim 16, wherein the indicator comprises at least one flexible support fixed onto the receptacle.
25. (Withdrawn) A device according to claim 24, wherein the flexible support is fixed onto the receptacle *via* an adhesive.
26. (Withdrawn) A device according to claim 16, wherein the dispenser member is connected to a remainder of the receptacle in removable manner.
27. (Withdrawn) A device according to claim 26, wherein the dispenser member is configured so as to allow closure of the storage space in sealed manner.
28. (Withdrawn) A device according to claim 16, wherein the dispenser member is connected to a remainder of the receptacle in non-removable manner.
29. (Withdrawn) A device according to claim 16, wherein the dispenser member is connected to the storage space via a flexible tube.
30. (Withdrawn) A device according to claim 16, wherein the indicator changes state when the temperature reaches a value lying in the range 30°C to 40°C.
31. (Withdrawn) A device according to claim 16, wherein the receptacle comprises a fixing member allowing the receptacle to be fixed onto a radiator.

32. (Withdrawn) A device according to claim 16, wherein the receptacle comprises ballast allowing the receptacle to have zero or negative buoyancy in water.
33. (Withdrawn) A device according to claim 16, wherein the substance is at least one of a cosmetic substance and a care substance.
34. (Withdrawn) A device according to claim 33, wherein the substance is selected from the following list: a shampoo, a shower gel, a self-tanning substance, a film-forming composition, a massage oil.
35. (Currently Amended) A packaging device comprising:  
a receptacle containing a treatment ~~substance~~substance, said receptacle comprising a fixing member allowing the receptacle to be fixed onto a radiator; and  
an indicator configured to change state as a function of temperature.
36. (Currently Amended) A packaging device comprising:  
a receptacle containing a treatment ~~substance~~substance, said receptacle comprising ballast allowing the receptacle to have zero or negative buoyancy in water; and  
an indicator configured to change state as a function of temperature.
37. (Canceled)
38. (Withdrawn) A method of applying a treatment substance contained in a packaging device as defined in claim 1, said method comprising:  
exposing the packaging device to at least one of a heat source so as to raise the temperature of the substance at least until the indicator changes state, and of a cold source so as to lower the temperature of the substance until the indicator changes state; and  
applying the substance.
39. (Withdrawn) A method according to claim 38, wherein the heat source comprises at least one of hot water, a hot surface and a radiator.

40. (Withdrawn) A method of applying a treatment substance contained in a device comprising a storage space and a dispenser member as defined in claim 16, said method comprising:

recharging the dispenser member with a dose of substance;

exposing at least the dispenser member to at least one of a heat source so as enable the temperature of the substance contained in said dispenser member to rise at least until the temperature indicator changes state, and a cold source so as enable the temperature of the substance contained in said dispenser member to drop at least until the temperature indicator changes state; and

applying the substance contained in the dispenser member.

41. (New) A device according to claim 1, wherein the dose corresponds to a volume less than 25 ml.

42. (New) A packaging device according to claim 35, wherein the fixing member is chosen among a hook, a cord, a hook-and-loop-type fastening zone and a magnet.
